TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Backend: Node JS, Express JS, Nest JS

Frontend: React JS, Next JS

Databases: MongoDB, SQL Server, MySQL, Supabase, PostgreSQL

Cloud: AWS, Azure Functions

Tools: Git, Github, Docker, Jira

UI Libraries: Material UI, Bootstrap, Tailwind CSS, Shadcn UI, SCSS

CERTIFICATES

AWS Certifications
- AI Practitioner (2025)
- Cloud Practitioner (2024)

Udemy Courses
- Nest JS (2025)
- Node JS (2023)
- Full Stack JavaScript (2023)

DSU Spectrum Participant
(DHA Suffa University, 2023)

HackerRank Skill Tests

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience, specializing in clean architecture, scalable systems, and building reliable, performance-driven applications. I bring ownership, analytical thinking, and a commitment to delivering high-quality solutions that support business growth.

WORK EXPERIENCE

Systems Limited - *Junior Consultant* — Jan 2024 - Present

Customer Service Portal: Microsoft Cloud Solution Provider

- A portal for Microsoft CSP partners, seamlessly integrated with Partner Center to manage customers, subscriptions, support tickets, and licenses etc.
- Owned development of core modules, designed database schemas, serverless APIs, and frontend UIs, handling complete API integration for e2e delivery.
- **Tools & Tech:** *Azure Functions, SQL Server, Node JS, React JS, Material UI, CSS*

RiftSpace: A MetaVerse Project

- RiftSpace is an immersive Metaverse-like platform for exploring and interacting in dynamic 3D worlds, enabling real-time communication among avatars.
- Responsible for crafting the frontend UI for a custom, dedicated CMS panel. Built an interactive 3D Level Editor using Babylon JS.
- **Tools & Tech:** *Babylon JS, React JS, Shadcn UI, Zod, Redux Toolkit*

DivDash LLC - *Junior Developer* — July 2025 - Oct 2025

Sympos AI Platform

- AI-powered platform that leverages multiple LLM agents to propose, challenge, and refine ideas through structured debate, improving decision-making quality.
- Setup the Multi-Agent LLM Debate Engine, and implemented WebSocket-based real-time communication to enable live, structured agent interactions.
- **Tools & Tech:** *Nest JS, Next JS, Supabase, Open AI SDK, Tailwind CSS, Shadcn UI*

Codesy Consulting - *Internee Developer* — Feb 2023

- Gained hands-on experience with Next.js and Material UI during internship training sessions and internal tasks

ZAB Solutions - *Internee Developer* — Sept 2022 - Dec 2022

- Practiced building interactive UIs with React.js and developing REST APIs using Node.js during internship training tasks

AWARDS

Koderz Kombat: 1st Position
(NED University, 2023)

SOFT SKILLS

Problem Solving

Innovative

Quick Learner

Detail Oriented

Leadership

LANGUAGES

English (Fluent)

Urdu (Native)

PERSONAL PROJECTS

Multi-Tenant HR Management Platform

- Built automated tenant onboarding system with dynamic database provisioning to support multi-tenant architecture.
- Implemented best database practices by assigning isolated logins per tenant, following the principle of least privilege, ensuring secure access control.
- Created reusable utility modules for future projects (OTP, Crypto, Notifications).
- **Tech & Tools**: *Node JS, Nest JS, TypeORM, TypeScript, SQL Server, Redis*

Computer Vision assisted Drive-Thru Web Store

- Integrated Automatic Number Plate Recognition (ANPR) system with our Drive-Thru Web Server to recognize vehicles of incoming customers and proactively notify store staff, reducing wait times.
- Developed Modules for Role-based Employee Management, Efficient Task Management, Time-based Attendance Tracking, Inventory Management, Payment Services, Data Visualization, Machine Learning Services for Time Series Forecasting & Item Recommendation.
- **Tech & Tools**: *Node JS, Express JS, EJS, MongoDB, IP Camera, Carmen Mobile App, PayPal, JavaScript, Ngrok, Plotly, Statsmodel, Python, Bootstrap, CSS*

Extract, Transform, Load (ETL Cycle)

- ETL pipeline implemented using Node.JS Streams to ensure a memory-efficient data processing flow, particularly when dealing with large datasets.
  The pipeline's main goal is to gather data from diverse sources, transform it into a consistent format, and then load it into a MongoDB collection.
- **Tech & Tools**: *Node JS, Express JS, EJS, MongoDB, JSON-Stream, CSV-parser, CSS*

Connectify (Social Media Web App)

- This app includes features like creating and editing posts, following other users, and implementing a news feed to display the latest posts from followed users.
  It also supports real-time messaging and notifications between users.
- **Tech & Tools**: *Node JS, Express JS, Socket.IO, EJS, MongoDB, Bootstrap, CSS*

EDUCATION

NED University of Engineering & Technology 2019 - 2023

Bachelor in Computer Science & IT

- A Grade (3.709 CGPA)
